NOTICE

In the District Court of Grady County, Oklahoma.

In the Matter of the Dissolution of the Garland Oil Company, a Corporation. No. 4219.

Notice is hereby given that on the 15th day of July, 1915, an application for the dissolution of the Garland Oil company, a corporation, was filed in the district court of Grady county, Oklahoma. By order of the court all persons desiring to file objections to said application must file same in this court on or before the 16th day of August, 1915, and thereafter, as provided by law, said court will proceed to hear and determine said application, together with objections filed, if any.

S. L. NEWMAN,

(Seal) Court Clerk.
S. C. DURBIN, ELTON B. HUNT,
Attorneys for Garland Oil Co.

7-16-1mo

If you sit in a cold draft when you are heated and get a stiff neck or lame back, you will be looking for something that will ease the pain. Fix your mind on Ballard's Snow Liniment and don't be talked out of it because it is the best pain relieving liniment you can get anywhere. Price 25c, 50c and \$1.00 per bottle. Sold by Owl drug store.—Adv. d&w

Imitation Not Always Well.

"Don't let yuh admiration make you imitate de bad qualities of great men," said Uncle Eben. "De fact dat de rose hab its thorn ain' no apology foh de thistle."

THE CLERK GUARANTEED IT.

"A customer came into my store the other day and said to one of my clerks, 'Have you anything that will cure diarrhoea?' and my clerk went and got him a bottle of Chamberlain's Colic, Cholera and Diarrhoea Remedy, and said to him, 'If this does not cure you, I will not charge you a cent for it.' So he took it home and came back in a day or two and said he was cured," writes J. H. Berry & Co., Salt Creek, Va. Obtainable everywhere.—Adv. d&w

DAILY EXPRESS ICE BLANKET

Saves 1/2
Your Ice Bills.

To its many subscribers, old and new, the Daily Express is offering a most unique premium that should at once become popular in every home in Chickasha where there is a refrigerator or ice box. The blanket is made of vegetable parchment, is thoroughly sanitary, and its value lies in the fact that it excludes heat from the outside and retains the cold air beneath. Just place the blanket loose over exposed side of ice, top or front, tucking the edges in. It will keep the outside warm air from coming in contact with the ice and save one half, and will not decrease refrigeration. The blanket is not porous so it will not become musty or strong smelling, won't dissolve or go to pieces when wet, so you need have no fear of clogging the drain pipe. Don't use any more porous, unsanitary cloths, burlap sacks or newspapers on your ice.

The only consideration necessary to secure one of these blankets, is to pay one month's subscription in advance to the Daily Express—forty cents—and our collectors, or the blankets may be obtained on the same terms at the Daily Express office.

If you do not desire to advance your subscription one month, the ice blanket may be bought at this office. Price 10 cents.

YOUR COUGH CAN BE STOPPED.

Using care to avoid draughts, exposure, sudden changes, and taking a treatment of Dr. King's New Discovery, will positively relieve, and in time will surely rid you of your cough. The first dose soothes the irritation, checks your cough, which stops in a short time. Dr. King's New Discovery has been used successfully for 45 years and is guaranteed to cure you. Money back if it fails. Get a bottle from your druggist; it costs only a little and will help you so much.

When Florence Was Capital.

Florence has had some previous association with the Italian court, for in 1864 it was made the temporary capital of Italy, and in the following year the king and court removed there. In the same year the first assembly of the Italian parliament took place there. Not until 1871 did the government remove to Rome as the capital of Italy.

IS SICKNESS A SIN?

If not, it's wicked to neglect illness and means of relief. It's wicked to endure liver ills, headache, indigestion, constipation, when one dose of Po-Do-Lax gives relief. Po-Do-Lax is podophyllin (May apple), without the gripe. It arouses the liver, increases the flow of bile—nature's antiseptic in the bowels. Your constipation and other ills disappear overnight because Po-Do-Lax has helped nature to remove the cause. Get a bottle from your druggist today. Get rid of your constipation overnight.—Adv. d&w

DO THE REPAIR WORK

IMPORTANT SHIPS THAT ACCOMPANY A SQUADRON.

British Navy Has Boats That Are Wonderfully Equipped for the Work—How They Operated While "In Action."

A battleship need not necessarily go home—into dock, that is to say—to have anything done to her. Within reason she can be repaired at sea, thanks to the various "repair ships" which are generally in attendance on a modern fleet, says Pearson's Weekly. Of course, every big warship nowadays has on board a blacksmith's forge and small repair shop, but naturally such a forge cannot handle everything. But unless a breakdown is very serious the damage is repaired by the ship's electricians and artificers. They call them "tiffers" in the navy for short. There are a number of famous repair ships, ships whose sole duty it is to patch up, on the high seas, any damage done to one of the units of the fleet.

The most famous of the ships are the Ark Royal, the Vulcan, the Cyclops and the Assistance. The Ark Royal is the only repair ship of its kind in the whole world. It is nothing more or less than a floating aeroplane factory, having on board appliances and materials for mending and building seaplanes, spare aeroplane engines and parts, as well as spare seaplanes all ready to be flown.

She is at present with the fleet that is bombarding the Dardanelles, for seaplanes there are almost as important as ships. Without the seaplanes, indeed, the big ships would be unable to tell whether they had got the proper range for smashing up the Turkish forts. The Cyclops is equal in capacity for work to a dockyard employing 300 hands, for she carries that number of skilled mechanics in addition to her crew. Every inch of room on board that can be spared is given up to the various "repair shops." The famous repair ship has on board a complete foundry, where castings can be made, and she is capable of turning out a new propeller for a battleship, and a battleship's propeller is not a small thing.

One of the curious things that would at once strike any visitor to the Cyclops is an enormous wooden anchor hanging over the side of the ship. This anchor is, of course, not used for anchoring, but is one of a set of "templets," or patterns, which the vessel carries for all sorts of castings required in the navy.

In addition to her big repairing plant the Cyclops carries a large distilling apparatus sufficient to supply fresh water to a number of ships, as well as ice-making machines and refrigerating rooms to keep food fresh during hot weather. No other ship in the world is fitted so completely with forges, smithies, furnaces and a big steam hammer as the Cyclops. The Assistance is a much smaller vessel, though she can carry out many repairs which are too big for an ordinary ship's workshop. The Vulcan is a special repair ship for torpedo boats. She is really a converted small cruiser of 7,000 tons. One of the first things a visitor would notice about her would be two huge cranes amidships. These cranes are worked by hydraulic power, and will lift a small vessel clean out of the water onto the deck in half a minute or so. The foundations of these cranes are fixed right on the keel of the Vulcan, otherwise the ship might dangerously heel over when heavy weights are being lifted. This repair ship, one of the oldest in the navy, by the way, carries launches on board which are used for mine sweeping, and below deck she can carry a hundred torpedoes, as well as some hundreds of mines, ready to hand out to any ship that wants them.

Distinguished Educator.

Prof. Jay Brownell Davidson, who comes to the University of California to fill the new position of professor of agricultural engineering, is a specialist in the testing of agricultural machinery. He graduated from the University of Nebraska in 1904. There he was later instructor in farm mechanics. He was employed in the experimental department of Deere & Co., and afterward by the International Harvester company. For the past ten years he has been in charge of agricultural engineering at Iowa State college. He is the joint author with Prof. L. W. Chase of "Farm Machinery," a book used generally throughout the United States, and he is the author of a text-book for secondary schools entitled, "Agricultural Engineering." Professor Davidson has designed several pieces of agricultural apparatus, including the Iowa integrating traction dynamometer.—San Francisco Argonaut.

Aerial Torpedoes.

Germans outside the Polish fortress of Osowiec are trying air torpedoes as a means of destroying the reinforced concrete forts. The torpedoes are a substitute for the "Busy Bertha" shells, and for the shells from the Austrian 12-inch mortars, which have done no damage worth mention.

The air torpedoes are small dirigible balloons, propelled by a compressed air motor. They can travel several miles. The charge consists of about fifty pounds of gun cotton in a thin cylinder, which is released automatically after the torpedo has traveled a certain distance. The lower end of the cylinder is cone-shaped.
